MN>Yesterday it happened again. I received my copy of the
>latest CQ and as usual it was in three (3) pieces:
>The front cover, the internal pages and the back cover.
>In other words, the cover has come off the rest of the
>magazine and is then torn in two pieces across the "back".

Got the same problem here, Mats. Have to tape the covers together
almost every time.
Must be the travel from US to SCA.

Usually horizontal, as is SSB and CW. FM vertical. There are probably
exceptions in some areas of the country, but that's always what I've
found.

Steve sbjohnston@aol.com

PS - If you get set up for 6 FM, say hi to the guys on 52.525 FM for me I
used to live in Norfolk and worked them every day.

yes we do have a 4 metre allocation in the UK. It's 70.000 - 70.050 MHz.

Also the following countries also have a 4m allocation: EI ZB 9H and 5B

During VHF NFD (July) our club (Reading & DARC) regularly work into EI and
ZB on 70 MHz.

Locally, most of 70 MHz seems to be occupied by Packetcluster users.

Not that is really a big deal, but I don't see how this situation is a
violation for Radio Shack. They are a retail dealer of electronic
equipment, and have the responsibility to instruct their _employees_ not
transmit on a ham rig unless they have a license. In this case, however,
you were the operator of the radio, and if you weren't licensed to use it,
you are in violation. Radio Shack can't control what others do, only
their own workers (maybe).

Again, no biggie, but a different viewpoint on this situation.
